

Operative Clocking OnSite Selfie

On-Site Selfie forms the core of CMS's Site attendance system. Providing all the expected functions such as Clock-in and Clock-out times, Geolocation Checks, and Selfie Pictures as well as the ability to log events throughout the day.

CMS's Cloud Based software CMS Hub provides the back end interface providing all administration and payroll interfaces. With all real-time data available to managers and HR staff.

Available for both Android and IOS devices, On-Site Selfie is easily installed by all your operatives, staff or subcontractors.

Usage can be based on user count or licensed by site.

- Operator Self Enrol
- Clock-in GPS Site Recognition
- History with comments
- Automated Payroll
- Site Muster Roll Call
- User Event with picture, comment and Location
- CMS Hub Administrator panel
- CMS Hub HR Panel

Operator Attendance

Allowing the operatives to use their own device for attendance logging removes any site entrance congestion issues. The Operator will be able to see his complete logs and selfies to Self QC any issues removing the requirement for paper time sheets and requirement to question payroll at end of pay periods.

On-site Managers will also have a live Update of their available site personnel to review against contracted work so that inefficiencies can be controlled before they become an issue.

Site Attendance Board and Muster

Once an operator clocks in and is automatically allocated to the site he becomes part of the sites attendance board.

Should the site be required to Muster designated Managers can Initiate a roll call process and identify all operatives at the Muster Point. For all operatives not at Muster contact details are provided.

Implementation & Support

On-Site Selfie is a cloud based app using web administration and IOS or Android Apps. Designed to offer an Intuitive Interface with short learning curve.

System is continually maintained and upgraded with changes implemented seamlessly, requiring little user interaction.
